RALLI INTERNATIONAL KINDERGARTEN

SESSION 2021-22

Various fun-filled and engaging activities were planned for the students of Kindergarten in the month of August. These activities helped the children in developing hand-eye coordination, increase concentration and developed a sense of achievement. These activities were very fruitful and children participated with great enthusiasm.

GLIMPSES OF THE ACTIVITIES

TEARING AND PASTING ACTIVITY

Tearing is a great workout for little fingers. Tearing and pasting activity was conducted on 2nd August for Prep classes to improve their fine motor skills and coordination. Children enjoyed tearing and pasting small pieces of paper in the nest.

CLAY MODELLING ACTIVITY

Clay is an excellent sensory tool that can enhance child's sense of touch, sight, smell, coordination skills and motor skills. Clay modelling activity was conducted on 5th August for the students of class Prep. The little hands worked smoothly and efficiently to fulfill their heart's desires and fantasies. They made a beautiful duck and displayed it with pride.

CREATIVITY WITH NUMBERS

Tiny tots of Ralli International Kindergarten enjoyed making different objects with numbers. This fun filled and joyful activity provided a platform for our little ones to show their creativity with numbers.

EXPLORING COLOURS

A very important part of learning during Kindergarten is identification and recognition of colours. Nursery students celebrated "Fun days with colours" in the month of August. The motive was to make the children aware of primary colours.

FUN WITH NUMBERS

Numbers help students develop creativity and the ability to think. With this activity, students learned to count, recognize, identify and write the numbers.

CREATIVE CORNER (Duck Making Activity)

Students of class Nursery took active part in the enthralling craft activity making ducks with yellow sheets. It was a fun-filled activity and it boosted the confidence of our little ones.

SORTING AND PAIRING ACTIVITIES

Sorting and pairing things together is an important cognitive skill. It helps young learners to better observe how things are alike and different. Children sorted the objects keeping in mind its characteristics and then they matched the objects that have the same characteristics.
