Voices in Action

**"Leadership is not in words spoken,
but in actions taken."**

Unlock your **potential!**

**EMPOWER
EVERY
VOICE**

Quarter 2
July- September

EDITORIAL

Dear Readers,

Every era of growth is marked by voices that dared to rise, to act, and to inspire. This quarter, we celebrate the courage of our RALLIANS—voices that do not remain silent, but step forward with ideas, initiatives, and leadership.

“Voices in Action” is more than a theme—it is a reminder that true change begins when thoughts turn into deeds. Whether it is leading a project, starting a dialogue, volunteering for a cause, or simply lending support to peers, every action has the power to ripple outward and shape the community around us.

In these pages, you will find stories of initiative, art that speaks without words, reflections that provoke thought, and experiences that show how even the smallest steps can carry immense strength. From bold beginnings to quiet perseverance, each contribution showcases the spirit of leadership and the belief that students are not just learners, but changemakers.

As you read, may you be inspired to find your own voice, and more importantly, to act on it. Remember—your one idea, your one action, your one stand can light the way for many others.

Here’s to voices that rise, actions that matter, and journeys that redefine what it means to lead.

Happy reading, and let your voice be heard through action!

Voice In Action

ओश्म तेजोऽसि तेजो नयि धेहि

Leadership is often described as the ability to guide others, but I believe true leadership is not found in titles or positions—it is found in action. A leader is not simply someone who speaks of change, but someone who takes the first step to bring it to life. This is why I see leadership as the “voice of action,” a voice that inspires others not only through words, but through deeds. As students, we hear about leadership in assemblies, speeches, and classroom discussions. Yet the essence of leadership is best understood when we see it in practice—when a classmate stands up for someone being treated unfairly, or when a student volunteers their time without being asked. These small acts remind us that leadership is not limited to grand gestures. It is in the everyday choices that reflect courage, kindness, and responsibility. Becoming Head Girl has given me the privilege to represent these values on behalf of my peers. To me, this role is not about authority but about accountability. It means being someone my fellow students can turn to, knowing that their concerns will be heard and their voices respected. It means setting an example, whether by maintaining discipline, supporting school events, or showing resilience when challenges arise. Most importantly, it means leading not from above, but alongside my friends and classmates. Leadership also demands consistency. Words can inspire for a moment, but actions build trust over time. That is why I believe the “voice of action” is the most powerful form of leadership—it is what convinces people that promises are real, and visions are achievable. A leader who only speaks risks losing credibility; a leader who acts earns respect and inspires others to act as well. At seventeen, I know I am still learning what it means to lead. Leadership is not a destination, but a journey that grows with every experience. There will be times of uncertainty and even mistakes, but each challenge will teach resilience, patience, and empathy. What matters most is the willingness to keep moving forward and to keep turning intentions into actions. In our school community, every student has the potential to lead. Whether it is helping a classmate with homework, organizing a club activity, or showing integrity during examinations, each action adds to the collective strength of our school. The Head Girl, prefects, and council may carry responsibilities, but leadership belongs to all of us. Together, our combined voices of action can create a culture of support, respect, and ambition. In the end, leadership is not about being the loudest voice in the room—it is about being the clearest example. It is about showing through actions what we hope others will believe in. As Head Girl, I hope to live up to this ideal, and to remind everyone that the most powerful form of leadership begins not with words, but with action.

Voices in Action

ओ३म् तेजो३ति ते॒जो॒ न॒मो॒ नमि॒

Leadership isn't just about a title or position—it's about having the courage to use your voice to bring positive change. A true leader doesn't just speak; they show their values through actions, choices, and the strength to stand up for what is right. When someone leads with confidence and sincerity, their words naturally inspire others to believe in themselves and take action.

Real leadership isn't about giving orders—it's about listening, encouraging, and building a vision that everyone can share. A leader's voice should carry empathy, unity, and responsibility, but it becomes truly powerful only when matched by consistent action. The best leaders don't just tell people what to do—they live by example, proving that leadership is about character as much as influence.

"Voice in Action" is a reminder that leadership comes alive when words turn into deeds. One strong voice, when backed by action, can spark a ripple effect—motivating many others to step forward. True leadership shows us that change begins with one person's courage, and together, those ripples can transform entire communities.

“EVERY ARTIST DIPS HIS BRUSH IN HIS OWN SOUL, AND PAINTS HIS OWN NATURE INTO HIS PICTURES.”

— HENRY WARD BEECHER

The Green Warriors of Class 8 “A Story of Environmental Leadership”

The Green Warriors' initiative began with a simple observation: the school ground near the canteen was littered with plastic bottles and food wrappers. Instead of ignoring the issue, a group of Class 8 students decided to take action. They formed a small club called the “Green Warriors,” where each student took on a specific role. Some decorated dustbins with creative designs and labels to encourage proper waste disposal, while others created posters highlighting the importance of cleanliness and sustainability.

As the Green Warriors worked together, their efforts began to pay off. More classes joined them, and soon the entire school was involved. Within a month, the campus had transformed into a clean and green oasis. Students, teachers, and staff became more aware of the importance of sustainability and proper waste disposal. The Green Warriors' initiative brought the school community together, fostering a sense of pride and ownership.

The most inspiring part of their story is that it began with one small step by a single student. Their action motivated others to join in, showing that leadership is not about giving orders but about leading through example.

The Green Warriors' initiative has left a lasting impact on the school community, promoting sustainability and environmental responsibility. It has empowered students to take ownership of their surroundings and make a positive difference, creating a culture of care and respect for the environment.

The Green Warriors' story is a testament to the power of collective action and the impact that one small step can have in building a more sustainable, environmentally conscious community. Their efforts continue to inspire others to take action, and their legacy grows stronger each day.

अओरुम् तेजोउसि तेजो मायि धोहि
Last year, I started a “Book Swap Corner” in my class. I brought a few extra storybooks and asked my friends to exchange them instead of buying new ones. At first, only two students joined, but soon many others brought their own books. Now, we have a small shelf with more than 40 books! Everyone enjoys reading something new every week without spending any money. It feels great to see how a small idea has grown into a habit of reading and sharing. I learned that one simple step can lead to a bigger change when friends come together.

One Action That Changed Something :-

I noticed that one of my classmates found maths very difficult and often felt left out. Instead of ignoring it, I decided to sit with them and explain the problems in a simple way. Slowly, two more friends joined me, and we formed a small study group. We helped each other in different subjects and shared easy tricks to learn. After a few weeks, our classmate became more confident and even started answering in class. Other students also asked to join, and soon our group grew bigger. This small step not only improved marks but also built teamwork and friendship. It brought a real change in our classroom learning.

Mission Possible: When Initiative Meets Teamwork

The alarm buzzed in the control room. A message flashed on the big screen: **"Warning: Communication system disabled. Mission in danger."** It felt like something straight out of a spy movie, but it was real.

Our team had been preparing for weeks to present a project at an inter-school science event. The project was based on a voice-controlled drone, and without the communication system, everything would collapse.

For a moment, silence filled the room. The challenge seemed too big. But then the spark of teamwork lit up. Instead of panicking, we decided to treat it like a mission report — calm, precise, and focused.

The first step was investigation. We checked every wire, every button, and every tiny part of the system. Nothing seemed broken; the problem was hidden somewhere deeper. That's when one of us realised the voice recognition software was not responding because of too many background noises.

Now came the second step — strategy. We split roles quickly. One of us shut down unnecessary devices that created noise. Another adjusted the microphone settings. A third tested the drone's backup commands. I kept track of the steps and made sure no one gave up.

It was not easy. The drone failed again and again. Each time it dropped, it felt like the mission was over. But each failure taught us something new. We adjusted our pitch, slowed our commands, and finally discovered that the system worked best when our voices were steady and clear.

At last, the moment arrived. We gave the final command together — firm, confident, and united. The drone rose smoothly into the air, lights blinking proudly. The communication system responded, and the mission was saved. The audience clapped, but for us, the applause was not the main victory. The real success was the lesson we carried: teamwork and initiative can turn the most impossible mission into "Mission Possible."

THE BIG IDEA: TURNING CURIOSITY INTO INNOVATION

ओ३म् तेजोऽसि तेजो मयि धेहि

Science begins with a question, but it comes alive through action. This year, I worked on designing a mini prototype of an “earthquake simulator” — a device that can generate earthquake simulators. The idea was inspired by the need for sustainable solutions in a world struggling with climate change. Using simple scientific principles of air compression and recycled plastic bottles, I created a model that reduced the room temperature by a few degrees naturally.

What amazed me most was how a simple science experiment turned into a practical innovation. It showed me that leadership in science is not about having a laboratory full of equipment, but about having the courage to apply knowledge to real problems.

This project also motivated my classmates to think differently —some started experimenting with solar chargers, while others researched water filters made from natural materials. Together, we realized that every small step in science is a big leap towards a sustainable future.

Science is not just a subject in our textbooks; it is our voice in action — a way to create, to lead, and to inspire change.

YOUR
OPINION
MATTERS

Is Teamwork Harder Than Solo Work?

“Teamwork is harder than solo work — but it is also more rewarding.”

ओ३म् तेजोऽसि तेजो मयि धेहि

When you work alone, you have full control: your pace, your ideas, your decisions. There are no clashes, no delays, and no compromises. But in a team, things change. You have to balance different opinions, respect different strengths, and sometimes set aside your own way for the good of the group. That's what makes teamwork challenging.

However, the very thing that makes it harder is also what makes it powerful. Teamwork teaches patience, communication, and leadership. It pushes us out of our comfort zones. A single person might finish faster, but a team often creates something bigger and stronger.

I think teamwork is like playing a sport: one player may score a goal, but the team wins the match. So yes, teamwork is harder than solo work — but if you can master it, the results are far greater than what you could achieve alone.

ANUBHAV YADAV , X A

Is Teamwork Harder Than Solo Work?

"Coming together is a beginning. Keeping together is progress.
Working together is success."

'Teamwork' is when a group of people work together to achieve a common goal. For any work to be completed successfully and uniquely, the quality of teamwork plays a very crucial role. In my opinion, solo work can be harder than teamwork because we have to do everything by ourselves. There is no one to share ideas with, help solve problems, or divide the workload. It can also feel lonely and stressful to face challenges alone. In teamwork, people can support each other, bring different strengths, and finish tasks faster by working together. So, even though it takes effort to cooperate, teamwork can often make work easier and more effective than working alone. Keeping the above in view, I personally believe that teamwork is not harder but proves to be advantageous and beneficial compared to working solo, which may lead to anxiety.

ओ३५ तेजो३सि तेजो मयि धेहे

A great leader is someone who inspires and motivates others to work toward a common goal. They possess a unique blend of qualities, including strong communication skills, empathy, and the ability to make tough decisions. Leadership is not just about giving orders, but about empowering others, fostering teamwork, and leading by example. A great leader should be able to adapt to changing situations, think critically, and prioritize the well-being of their team. Ultimately, a great leader brings out the best in others and drives positive change. By doing so, they create a lasting impact and leave a legacy that continues to inspire future generations. Effective leadership is about growth, collaboration, and vision. A true leader's success is measured by the success of their team.

Alumna Spotlight: Arpit Sharma (Batch 2024-25)

Arpit Sharma, an accomplished alumnus of Ralli International School, is currently pursuing a Bachelor of Technology in Computer Science and Engineering at IIIT Kota. By earning a place in one of India's premier technology institutes, Arpit has made a remarkable stride toward a future in the evolving world of engineering and innovation. His consistent discipline and drive are evident, as he navigates both academic rigor and the vibrant life of an engineering campus. With a strong foundation in problem-solving and technology, Arpit continues to seize every opportunity, fueling his passion for Computer Science while preparing for a dynamic and impactful career ahead.

GOAL

Alumna Spotlight: Tanushri Mehra (Batch 2023-24)

Tanushri Mehra, a proud alumna of Ralli International School, is currently pursuing her Honours in Psychology at Daulat Ram College, University of Delhi. By securing admission to one of the university's esteemed psychology departments, she has taken a significant step toward shaping her future in this fascinating field. With her dedication and determination, Tanushri is not only strengthening her academic foundation but also embracing her passion for understanding the human mind and its many dimensions. Her journey reflects both focus and enthusiasm as she continues to make the most of her college experience while preparing for a promising career ahead.

SUCCESS

Your Voice, Your Journey

Q: How did your time at Ralli International School shape your voice and confidence as a student?

Ralli International School gave me numerous opportunities to showcase my talent—through assemblies, competitions, and cultural activities. Each experience pushed me to step forward, speak up, and participate actively, which helped me develop both my voice and confidence as a student.

Q: Moving from Ralli to Daulat Ram College, how did you find your own voice in a much bigger academic world?

Honestly, it was quite unexpected for me to land at Daulat Ram College. I had worked very hard for my board exams, and that preparation really helped with CUET—so I didn't need much extra effort. With the guidance of my teachers, the transition felt smoother, and over time, I discovered my own voice in the larger and more diverse academic environment.

Action in Choices

Q: What inspired you to choose Psychology Honours as your undergraduate course?

I have always been deeply interested in the social sciences. Initially, I also considered English, but psychology fascinated me more because it

"If you are genuinely passionate, psychology is worth pursuing—every field carries risk, but with effort and commitment, it can definitely shape your future."

combined curiosity about the human mind with practical applications. After exploring my options, I realised that psychology was where my true passion lay.

Q: How did you decide that Daulat Ram College was the right place to continue your journey?

Honestly, it wasn't something I had planned—it was more of an unexpected opportunity. But once I researched further, I realised Daulat Ram has one of the best psychology departments in Delhi University and being part of North Campus offered great exposure. That convinced me it was the right choice.

Campus Life in Action

Q: Can you share one memorable "voice in action" moment from Daulat Ram College?

One of the most memorable experiences for me was *Manotsav*, our annual psychology fair and conference. It brought together students, professors, and even professional psychologists for panel discussions and presentations. Being part of this event gave me the chance to learn, present, and interact with experts—it really boosted my confidence and made me feel part of the academic community.

Q: How do you balance your academic responsibilities with cultural or extracurricular engagements in college?

Initially, it was challenging because college life requires a lot of self-learning and independence. But gradually I developed time-management skills. I make sure to prioritise academics while also participating in events, societies, and discussions that interest me. Finding that balance has helped me grow personally as well as academically.

ओ३म् तेजोऽसि तेजो मयि धेहि

"College life will demand independence, self-learning, and resilience—but every challenge can turn into an opportunity for growth."

Facing Challenges, Taking Action

Q: What challenges did you face in the transition from school to college, and how did you overcome them?

The biggest challenge was adjusting to the independence of college life. In school, teachers guided us constantly, but in college you are very much on your own. I felt a bit lost during the first two to three months. However, I slowly adapted by building new habits like regular reading, taking part in presentations, and interacting with peers and seniors. These steps helped me overcome the initial struggle.

Q: What qualities or habits can today's school students start developing to make their transition smoother and more impactful?

I would suggest cultivating habits of self-learning, reading beyond the syllabus, and developing strong communication skills. Also, participating in extracurriculars during school really helps, because in college you need to manage academics along with other responsibilities. These small practices build confidence and make the transition easier.

A Voice for Juniors

Q: What advice would you give to your juniors at Ralli International School as they prepare for life after school?

Cherish your school years because you will miss them later. At the same time, take your academics seriously and give your best effort—it really pays off when you move to higher studies. Don't shy away from opportunities; get involved in activities, because those experiences shape you in ways books alone cannot.

Q: If you could leave one message as your "voice in action" for the next generation, what would it be?

Success is never easy—you need both hard work and patience. College life will demand independence, self-learning, and resilience. But if you are passionate and committed, every challenge will turn into an opportunity for growth.

6. Fun & Personal

Q: Describe your journey from Ralli to Daulat Ram in three words.

Unexpected, challenging, rewarding.

Q: What's one school memory that still makes you smile and reminds you of where your journey began?

Morning assemblies are a memory I'll always cherish. Standing on stage, participating in competitions, and celebrating events with friends gave me some of my happiest moments and taught me the importance of community.

Your Voice, Your Journey

Q: How did your years at Ralli International School shape your discipline and confidence as a student? What was the biggest shift you experienced when moving from school life to IIIT Kota?

School was the foundation of my career as it taught me the true essence of discipline. By participating in various school events, my confidence skyrocketed and it improved my personality. The biggest shift was moving from a guided school routine to the independent culture of IIIT Kota. Managing studies, responsibilities, and hostel life taught me adaptability, time management, and teamwork. Hostel life had a great impact on my personality development.

Q: What motivated you to choose Engineering, and particularly Computer Science, as your field of study? Why did you feel IIIT Kota was the right place to pursue your passion? What would you say to juniors who want to prepare for JEE but feel unsure about handling the pressure?

"Consistency and self-belief matter more than endless hours—trust the process, and success will follow."

I chose CSE because I felt a natural connection with the subject, and it also offers excellent placement opportunities. IIIT Kota's strong focus on Computer Science, supportive faculty, and vibrant coding culture made it the right choice for me. The peer learning and real-world exposure matched my passion to grow in this field. JEE preparation may seem tough at first, but with consistency, clear targets, and self-belief, it becomes manageable. Discipline matters more than endless hours.

Action in Choices

Q. Can you share a memorable "voice in action" moment from campus – perhaps a project, coding challenge, or cultural event that left a mark on you? How do you balance intense academics with hostel life, peers, and extracurricular activities?

Campus life is awesome! At first, before classes began, we all bonded by playing cricket, and currently we are celebrating Ganesh Chaturthi – it's marvelous. Balancing academics with hostel life requires proper time management. I prioritize important tasks, study efficiently, and also make space for friends, sports, and cultural events. This balance keeps me motivated and prevents burnout.

Campus Life in Action

Q: How do you balance your academic responsibilities with cultural or extracurricular engagements in college?

Balancing academics with hostel life requires proper time management—I prioritize important tasks, study efficiently, and still make space for friends, sports, and cultural events.

Facing Challenges, Taking Action

Q. What challenges did you face during JEE preparation and later in adapting to IIIT life? How did you overcome them? What study habits or strategies can today's school students adopt early to strengthen their preparation for competitive exams?

During JEE preparation, I sometimes felt that handling both school and JEE was too bothersome, but I didn't let it overwhelm me. I took the exam with a free and calm mindset. For students today, I'd suggest developing consistent study routines, revising daily, and practicing problem-solving. Understanding concepts deeply instead of rote learning is crucial. Time management, self-discipline, and staying calm during exams are habits that go a long way.

A Voice for Juniors

"Never underestimate the power of steady effort—discipline and patience turn challenges into achievements."

Q: What advice would you give to your juniors at Ralli International School who are aiming for IIT/IIIT or other competitive fields? If you could leave one message as your "voice in action" for the next generation, what would it be?

Stay disciplined and focused on your journey. Don't get distracted by comparisons. Everyone has their own pace, so work hard consistently, trust your teachers, and keep faith in yourself. Always believe in your potential. Even if challenges seem huge, persistence and self-belief will take you far. Never underestimate the power of consistent effort — it builds success over time.

6. Fun & Personal

Q. If you had to describe your journey from Ralli to IIIT Kota in just three words, what would they be? What's one school memory that still motivates you whenever you look back?

My journey in three words: Struggle, Patience, Fun.

One school memory that still motivates me is our Annual Function in class 10 — it always reminds me of teamwork and joy.

Poetry in Blossom

“THE SCIENCE WITHIN”

In every question, a voice takes flight,
In every theory, a spark of light.
From Newton’s apple to rockets in
space,
Science in action leads the race.

Equations whisper, experiments speak,
Strong is the curious, brave is the
meek.

One student’s idea, a ripple begun,
Together in science, we all become
one.

PRISHA IX A

Leadership

A leader is not just one who commands,
But one who uplifts with gentle hands. Through
storms they walk with steady stride, A beacon of
hope, a trusted guide.

They listen more than they speak,
Find strength in places others feel weak.
Not power alone, nor glory they chase,
But courage, compassion, and boundless grace.

They sow belief where doubt may grow, They light
the path so others know.

With vision clear and purpose true,
They dream for all, not just for few.

Leadership shines not from a throne, But in lifting
hearts, making courage our own.
It lives in service, in standing tall,
The truest leader serves us all.

-Sakshi

X-A

SILENT FIRE, BOLD VOICE

Silent, strange — he walked alone, unseen behind dead eyes.

They mocked, they swarmed — he moved through them like storms
beneath the skies.

ओ३म तेजोऽसि तेजो मयि धेहि
The bully laughed, the crowd obeyed — but he cut through their disguise.

All watched while she broke, on the edge — too tired to even cry.

He saw her fall where no one dared to bleed or even care,

Then stepped through hell — not to be brave, but 'cause no one else was
there'.

The bully raised his hand to strike — her eyes shut, breath on hold.

A sudden grip froze his motion, still — silent strength in burning cold.

The boy, that quiet deskmate, stood where coward shadows fell,

A calm resolve beneath the storm — fiercer than those who yell.

No fists were raised — just venom laced in words as sharp as knives.

No rage, no shout — just steady tones that sliced through shallow lives.

One voice, one line — enough to drain the colour from his face,

And in his place stood something worse — the quiet one, with grace.

He slipped his coat around her shoulders — warmth in bitter air.

Amid the chaos, his voice rose — a spark none thought was there.

They cast him off as cruel and blank — till silence turned the tide.

He proved them all wrong: a quiet heart can burn fierce flames inside.

In silent strength, he spoke without a shout — broke chains to claim the
right.

A quiet spark that lit in dark — the shadow's fiercest fight.

No need for noise to hold the crown, no roar to shake the hall.

He proved that even silent souls can rise and break the fall.

- DIVYANSHI KAR

Teachers' Day

**TEACHING IS A
WORK OF HEART**

CHOICE & CONSEQUENCE

“THE PLASTIC BOTTLE DILEMMA”

Imagine this situation 📌

You see a classmate throw a plastic water bottle on the ground after lunch.

➡ What do you do?

Option A: Ignore it and walk away.

- Consequence: The bottle adds to the litter, and others think it's okay to do the same. 🌍🗑️

Option B: Pick it up yourself and throw it in the recycling bin.

- Consequence: The place looks cleaner, but your classmate doesn't learn from the mistake. ♻️✨

Option C: Politely tell your classmate to throw it in the bin and explain why.

- Consequence: Your peer becomes more mindful, and others notice your initiative. 🌱🙌

👉 **As readers trace their own action path and reflect:**

- Which choice would YOU make?
- How could your voice & action ripple out to inspire others?

Leadership Puzzle Challenge

ओ३म् तेजोऽसि तेजो मयि धेहि

Hidden in this word search are five powerful words that reflect the spirit of leadership and action. Can you find them all?

Words to find: **INITIATIVE, COURAGE, DIALOGUE, TEAMWORK, CHANGE**

Thank you

As we close this edition, we extend heartfelt gratitude to all who made it meaningful.

To our students—your creativity and courage embody “Voices in Action.” To our teachers and mentors—thank you for nurturing ideas and inspiring confidence. To our alumni, parents, and well-wishers—your support strengthens our spirit. And to our readers—your engagement gives life to every page.

Together, we are not just telling stories, but shaping them. May this spirit of gratitude and action continue to inspire us all.

See you again in the next edition!

Regards

The Editorial Team
